Art Unit: 2121

First Action on the Merits

1. Claims 9-16 of U.S. Application 10/579,485 filed on 05/16/2006 are presented for

examination.

2. Claims 1-8 are cancelled.

Quotations of U.S. Code Title 35

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United

States and was published under Article 21(2) of such treaty in the English language.

4. The claims and only the claims form the metes and bounds of the invention. "Office

personnel are to give claims their broadest reasonable interpretation in light of the supporting

disclosure. In re Morris, 127 F.3d 1048, 1054-55, 44 USPQ2d 1023, 1027-28 (Fed. Cir 1997).

Limitations appearing in the specification but not recited in the claim are not read into the claim.

In re Prater, 415 F.2d 1393, 1404-05, 162 USPQ541, 550-551 (CCPA 1969)" (MPEP p2100-8, c

2, I 45-48; p 2100-9, c 1, I 1-4). The Examiner has full latitude to interpret each claim in the

broadest reasonable sense. The Examiner will reference prior art using terminology familiar to

one of ordinary skill in the art. Such an approach is broad in concept and can be either explicit or

implicit in meaning.

Information Disclosure Statement

5. The information disclosure statement (IDS) submitted on 05/16/2006 is in compliance

with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being

considered by the examiner.

Claim Objections

6. Claims 10-12 and 14-16 are objected to because of the following informalities: the

claims are depended on cancelled claims. Accordingly, the claims 10-12 and 14-16 not been

further treated on the merits. Appropriate correction is required.

Claim Rejections - 35 USC § 102

7. Claims 9 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent

No. 7,003,688 ("Pittelkow").

Regarding claim 9

Pittelkow teaches a redundant automation system for controlling a technical device (e.g. col. 3

lines 62-65, fail-safe and fail-over operation), comprising: a first automation device identified as

a master automation device (e.g. col. 9 lines 50-60, master controller); a second automation

device identified as a standby automation device (e.g. col. 12 lines 16-21, slave controllers), and

a memory unit operatively connected to the first and second automation devices that includes a

common memory area that can be written to and read by the first and second automation devices

(e.g. col. 4 lines 1-7, common memory storage device) and stores status data of the first and

second automation devices wherein the data present in the memory area is available in parallel to

Application/Control Number: 10/579,485 Page 4

Art Unit: 2121

the first and second automation devices (e.g. col. 4 lines 19-29, each controller is permitted to

have read access to all of the respective storage portions).

Regarding claim 13

Pittelkow teaches a method for operating a redundant automation system for controlling a

technical device (e.g. col. 3 lines 62-65, fail-safe and fail-over operation), comprising: operating

a first automation device as a master (e.g. col. 9 lines 50-60, master controller); operating a

second automation device as a standby (e.g. col. 12 lines 16-21, slave controllers); and storing

status data of the first and second automation devices in a memory unit wherein a common

memory area of the memory unit can be written to and read from by the at least two automation

devices (e.g. col. 4 lines 1-7, common memory storage device), wherein the data present in the

memory area is available in parallel to the automation devices (e.g. col. 4 lines 19-29, each

controller is permitted to have read access to all of the respective storage portions).

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to examiner *Thomas Pham*; whose telephone number is (571) 272-

3689, Monday - Friday from 7:30 AM - 4:00 PM EST or contact Supervisor Mr. Albert Decady

at (571) 272-3819.

Any response to this office action should be mailed to: Commissioner for Patents, P.O.

Box 1450, Alexandria VA 22313-1450. Responses may also be faxed to the official fax

number (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
